

# BLINK BLINDS + GLASS FOR DOORS & WINDOWS

Blink Blinds + Glass incorporates traditional window blinds between two glass panels so they are completely enclosed—which means no dust collects on blinds, and they stay beautiful for years. To add to this innovation, Polar Windows add an extra piece of glass and delivers true triple pane performance for patio doors, door lites and different windows types.

This simple solution addresses and solves concerns about the safety, cleaning, and lack of ease associated with traditional blinds and designs and options to fit every home.

## Color Choices and Easy to Use

Blind Blinds are available in six fashionable colors and feature cordless Easy Glide operators for easy, complete control of light and privacy.

White

Sand

Tan

Silver Moon

Slate Gray

Espresso
